FARMERS GROWING FOR FARMERS

SeedNet strives to provide the highest quality seed available for Canadian farmers. With an ever-growing lineup of seed varieties, from cereals and pulses to specialty crops and hybrid fall rye, SeedNet brings together knowledgeable seed professionals and a trusted dealer network dedicated to helping your operation succeed. SeedNet is farmers growing for farmers, and we are proud to work alongside an amazing network of seed dealers who share our commitment to performance, reliability, and service.

Fourteen independent seed growers, with experience spanning 15-50 years, came together to form SeedNet in 2010. This long-held knowledge of growing, processing, and selling seed drives our success. We are dedicated to providing farmers with the highest quality seed and farm inputs available. Our farmer members have firsthand, real-life experience with the products we sell and the services we provide.

By working in unity while drawing on our individual perspectives, we can provide a strong voice within a large industry. Our goal is to develop partnerships that stimulate long-term opportunities and pass the value of those opportunities back to our customers. We are informed, invested, and committed to the seed industry and our communities.

CEREALS

Barley . Durum . Wheat . Hybrid Fall Rye . Triticale

AB BrewNet MALT BARLEY

AB BrewNet is a 2-row malting barley that is ideal for brewing, feed, or forage. There is good market potential for AB Brewnet given its high yields and plump kernels

Yields Equal to Synergy

Good lodging resistance

Test weight and kernel weight are similar to checks

Moderate resistance to FHB, smuts and scalds

2026 Alberta Seed Guide	2 or 6 Row	Non-Glycosidic Nitriles Trait	Yield (% AAC Synergy)	Maturity (days)	Height (cm)	Lodging Resistance
AAC Synergy	2	Regular	100	93	81	Fair
AB BrewNet	2	Regular	100	96	88	Good

AB Dram MALT BARLEY

Early maturity

4% higher yield than CDC Copeland

Two-row, hulled barley with good malting potential

Good lodging resistance and a good disease package with low DON accumulation

Non-glycosidic nitrile (non-GN) line-ideal for distilling (a novel trait and first bred in Canada)

2026 Alberta Seed Guide	2 or 6 Row	Non-Glycosidic Nitriles Trait	Yield (% AAC Synergy)	Maturity (days)	Height (cm)	Lodging Resistance
AAC Synergy	2	Regular	100	93	81	Fair
AB Dram	2	Non-GN	91	92	82	Fair

WCI Fortify FEED BARLEY

Launching Fall 2027

6-row feed barley

High grain yield

Good lodging score

Ultra smooth awns

Excellent disease package with R or MR to Rusts, Scald and Spot from Net Blotch

2026 Alberta Seed Guide	2 or 6 Row	Yield (% AAC Synergy)	Maturity (days)	Height (cm)	Lodging Resistance
AB Cattlelac	6	98	93	90	Good
WCI Fortify	6	102	95	85	Good

AAC GoldNet DURUM

AAC GoldNet Durum comes from the parentage of AC Transcend. AAC GoldNet has exceptional yields, an excellent disease package and strong standability.

Good standability

8% yield above Stronghold

Medium season durum

Good resistance to FHB

2024 Alberta Seed Guide	Yield (% Strongfield))	Maturity (days)	Height (cm)	Protein	Lodging Resistance	Stripe Rust
Strongfield	100	107	86	14.5%	Fair	Susceptible
AAC GoldNet	108	108	90	14.5%	Good	Susceptible

AAC Chiffon VB

SOFT WHEAT

AAC Chiffon is a high-yielding soft wheat of medium-tall stature, with an awned spike and hollow stem. It has good straw strength, good shattering resistance, and high kernel weight. It is well adapted to soft wheat-growing areas of the Western Prairies, developed by Agriculture Canada Lethbridge.

High yielding

Performs well under dry conditions

Days to maturity comparable to AC Andrew

Resistant to stripe rust & powdery mildew

2026 Alberta Seed Guide	Yield (% AC Andrew)	Maturity (days)	Height (cm)	Protein	Lodging Resistance	Stripe Rust Resistance
AC Andrew	100	104	85	11.4%	Good	Intermediate
AAC Chiffon VB	105	104	97	10.9%	Fair	Moderate

AAC Galore VB

SOFT WHEAT

Launching Fall 2026

Well adapted to all growing areas of Western Canada. It is medium tall in height, high-yielding and exhibits good resistance to stripe and stem rust.

Midge Tolerant Variety

Overall higher grain yield than AC Andrew and Sadash

Significantly higher yielding under dryland

Higher test weight than AC Andrew

Good resistance to stripe rust and stem rust

2026 Alberta Seed Guide	Yield (% AC Andrew)	Maturity (days)	Height (cm)	Protein	Lodging Resistance	Stripe Rust Resistance
AC Andrew	100	104	85	11.4%	Good	Intermediate
AAC Galore VB	111	104	88	11.7%	Good	Moderate

AAC Network WINTER WHEAT

AAC Network winter wheat is an excellent replacement for AAC Gateway. It's a milling quality winter wheat with high protein.

Good winter survival
 Stands very well with short, strong straw
 More drought tolerance vs AAC Gateway
 Improved rust resistance over AAC Gateway

2026 Alberta Seed Guide	Yield (% AAC Coldfront)	Maturity (days)	Height (cm)	Protein	Lodging Resistance	Winter Survivability
AAC Coldfront	100	219	85	12.4%	Very Good	Very Good
AAC Network	94	220	79	12.7%	Good	Very Good

KWS Serafino HYBRID FALL RYE

KWS Serafino offers maximum yield performance for whole crop or grain, with a leading harvest index. This variety is the newest leader in grain yields for the KWS line up, and it is noted for its excellent grain quality.

Very high yields for both grain and forage
 Multi-purpose Rye: Grain; feed, flour, and distilling
 Excellent drought stress tolerance
 Low ergot risk
 Very high falling numbers

2026 Alberta Seed Guide	Hybrid or Open Pollinated	Yield (% Hazlet)	Falling Numbers	Height (cm)	Winter Survivability	TKW (g)	Lodging
Hazlet	OP	100	182	106	EX	38	Good
KWS Serafino	Hybrid	131	309	96	EX	33	Good

AB Windchill WINTER TRITICALE

Launching Fall 2027

High sustainable grain yield
Dry Matter yield 106% of Louma 104% of Metzger
Early maturing
Excellent Lodging Resistance
Good ergot disease protection

2026 Alberta Seed Guide	Yield (% Metzger)	Maturity (days)	Height (cm)	Winter Survival	Lodging Resistance	TKW (g)
Metzger	100	215	114	Very Good	Fair	36
AB Windchill	118	213	95	Very Good	Very Good	40

Tadeus WINTER TRITICALE

Tadeus is an awned European bred triticale variety that is short stature, has a strong straw with excellent yields.

Very good winter hardiness
Excellent standability
Some drought tolerance
Low FHB risk

AB Sunbeam

SPRING TRITICALE

AB Sunbeam is an awned spring triticale, suitable for feed and forage.

High grain yield, 110% of Pronghorn and 106% of Brevis.

Dry matter yield is 105% of Taza, similar to Pronghorn.

High resistance to ergot, better than AC Ultima and Pronghorn checks.

Intermediate resistance to FHB.

2025 Alberta Seed Guide	Yield (% Brevis)	Maturity (days)	Height (cm)	Protein	Lodging Resistance	Stripe Rust Resistance
Brevis	100	107	93	14.5%	Good	Moderate
AB Sunbeam	106	104	97	14.5%	Good	Resistant

PULSES

Lentils . Chickpeas . Faba Beans . Peas .

CDC Simmie RED LENTIL

CDC Simmie is a Clearfield red lentil variety with early medium maturing variety, bred by Albert Vandenberg at the University of Saskatchewan. CDC Simmie has an excellent disease package, and yields are 103% – 109% of CDC Maxim. Bred at the Crop Development Centre at the University of Saskatchewan.

Rated at 34 cm tall
Early to medium maturity
Good resistance to blight
Good resistance to anthracnose

2026 Alberta Seed Guide	Yield (% CDC Maxim)	Height (cm)	TSW (g)	Maturity Rating	Ascochyta Blight
CDC Maxim	100	34	40	Early/Medium	MR
CDC Simmie	108	34	39	Early/Medium	MR

CDC Proclaim RED LENTIL

CDC Proclaim is a small red Clearfield lentil variety bred by CDC in Saskatoon. In 6 years of testing in Saskatchewan's Coop and Regional trials, CDC Proclaim yielded 105% of CDC Maxim in the brown and dark brown soil zones. Bred at the Crop Development Centre at the University of Saskatchewan.

Yield up to 112% of Maxim
Clearfield trait
Rated 34 cm tall
Moderate resistance for Ascochyta Blight & Anthracnose

2026 Alberta Seed Guide	Yield (% CDC Proclaim)	Height (cm)	TSW (g)	Maturity Rating	Ascochyta Blight
CDC Maxim	100	34	40	Early/Medium	MR
CDC Proclaim	112	34	40	Early/Medium	MR

CDC Koda

SMALL GREEN LENTIL

Launching Spring 2028

High yield

Thicker seed (more efficient in the dehulling process)

Tolerant to imidazolinone herbicide

Moderately resistant to Ascochyta

Bred at the Crop Development Centre at the University of Saskatchewan

2023/2024 Co-Op Registration	Yield (% of CDC Nimble)	Seed Weight (g/1000)	Maturity	Lodging (1-5)	Height (cm)	Ascochyta Blight Resistance
CDC Nimble	100	36	84	1.4	40	MR
CDC Koda	124	39	85	2.0	39	MR

CDC Palmer

KABULI CHICKPEA

CDC Palmer is a high-yielding Kabuli chickpea with a light cream-beige colour and ram-head-shaped seed. It was released to Saskatchewan and Alberta Select Seed Growers in 2014. It has medium-late maturity and moderate resistance to ascochyta blight. CDC Palmer is well suited to all current chickpea-growing areas in southern Saskatchewan and southeastern Alberta's Dark Brown and Brown soil zones. Bred at the Crop Development Centre at the University of Saskatchewan.

Medium to late maturity

Seed size is predominantly 9-10 mm

Moderately resistant to Ascochyta Blight

Fabelle

FABA BEAN

Fabelle is a medium-sized faba bean with low tannins and high yields. Developed by DL Seeds in Manitoba, Fabelle Fababean is a low-vicine/convicine faba bean that fits well in the growing food and feed markets.

Low vicine / convicine so suitable for food and fababean food ingredients use

High yield & Good standability

Medium seed size (slightly larger than Snowbird)

Yielded 121%+ of check in 2017 Alberta yield trials

2026 Alberta Seed Guide	Type	Flower Colour	Low Vicine/Convicine	Yield (% Fabelle)	Maturity (days)	Plant Height (cm)	Thousand Seed Weight (g)
Snowbird	Low Tannin	White	No	90	105	104	533
Fabelle	Tannin	Coloured	Yes	100	104	95	448

Dosis

FABA BEAN

Up to 3-5 days earlier than Fabelle

Minimum yield drag

Well suited for north central and north prairies

4 days earlier than Fabelle

Increased protein potential

2026 Alberta Seed Guide	Type	Flower Colour	Low Vicine/Convicine	Yield (% Fabelle)	Maturity (days)	Plant Height (cm)	Thousand Seed Weight (g)
Fabelle	Tannin	Coloured	Yes	100	104	95	448
Dosis	Tannin	Coloured	Yes	92	103	106	521

Hammer

FABA BEAN

Launching Spring 2027

Coloured flowers
 Vicine/Convicine content = Low
 105% yield over Fabelle
 High protein potential up to 26%

2026 Alberta Seed Guide	Type	Flower Colour	Low Vicine/Convicine	Yield (% Fabelle)	Maturity (days)	Plant Height (cm)	Thousand Seed Weight (g)
Fabelle	Tannin	Coloured	Yes	100	104	95	448
Hammer	Tannin	Coloured	Yes	105	106	102	536

Futura

FABA BEAN

Launching Spring 2027

Coloured flowers
 Improved yield vs Fabelle
 Vicine/Convicine content = Low
 Seed size similar to Fabelle

2026 Alberta Seed Guide	Type	Flower Colour	Low Vicine/Convicine	Yield (% Fabelle)	Maturity (days)	Plant Height (cm)	Thousand Seed Weight (g)
Fabelle	Tannin	Coloured	Yes	100	104	95	448
Futura	Tannin	Coloured	Yes	103	106	107	530

AAC Planet YELLOW PEA

Improved yield

Improved protein potential

Excellent lodging scores

Resistant to powdery mildew

Bred at the Crop Development Centre at the University of Saskatchewan

2026 Alberta Seed Guide	Yield (% CDC Amarillo)	Protein (%)	Maturity	Vine Length (cm)	Standability (1-9)	Seed Coat Breakage	Seed Coat Dimpling
CDC Amarillo	100	23.7	Medium	85	2.9	Fair	Fair
AAC Planet	104	24.9	Medium	90	2.6	Good	Fair

CDC Citrine YELLOW PEA

Top yielding pea in 2021 MCVET trials

Mid-maturing

Very good standability

Improved protein

Protein potential is (0.5% higher than CDC Amarillo)

Improved resistance to Fusarium root

Bred at the Crop Development Centre at the University of Saskatchewan

2026 Alberta Seed Guide	Yield (% CDC Amarillo)	Protein (%)	Maturity	Vine Length (cm)	Standability (1-9)	Seed Coat Breakage	Seed Coat Dimpling
CDC Amarillo	100	23.7	Medium	85	2.9	Fair	Fair
CDC Citrine	106	23.7	Medium	85	3.2	Good	Good

DL Lacross FORAGE PEA

DL Lacross is a semi-leafless forage pea developed in Europe for green manure and silage. DL Lacross performs well in mixed cropping situations or as a single crop. It has a smaller seed size and stands very well on irrigation and dryland. Bred at the Crop Development Centre at the University of Saskatchewan.

Good yield potential for forage use
Very good standability/ Lodging resistance
Very early maturity
Small seed size

2026 Sask Seed Guide	Yield (% CDC Amarillo)	Protein (%)	Maturity	Vine Length (cm)	Lodging Score (1-9)	Seed Weight (g/1000)
CDC Amarillo	100	23.7	Medium	85	2.9	230
DL Delicious	68	24.7	Late	110	4.1	200
DL Lacross	89	24.3	Medium	110	3.9	170

Yield is from Sask 1, 2 and South 3 Zones

CDC Dorado YELLOW FLAX

Bred at the Crop Development Centre at the University of Saskatchewan, CDC Dorado is a high-yielding yellow flax with better oil content, linolenic acid content, and a good disease package among other positive characteristics. CDC Dorado is suited to all flax-growing areas of western Canada. In regional trials, yields were significantly higher than the checks in the longer growing seasons of the black and dark grey soil zones and equal to check yields elsewhere.

2026 Alberta Seed Guide	Colour	Yield (% CDC Glas)	Maturity	Seed Size	Height (cm)	Oil Content (%)	ALA Content (%)
CDC Glas	Brown	100	108	Medium	62	46	57
CDC Dorado	Yellow	89	106	Large	55	45	64
