

AAC NETWORK WINTER WHEAT

AAC Network winter wheat is an excellent replacement for AAC Gateway. It's a milling quality winter wheat with high protein.

STRENGTHS:

- Good winter survival
- Stands very well with short, strong straw
- More drought tolerance vs AAC Gateway
- Improved rust resistance over AAC Gateway

"Producers often want varieties that can be grown reliably under a wide range of scenarios, including irrigation. That means high stable yields, good survival, excellent stability and a broad disease package. I believe AAC Network offers all of these things and more."

-Dr. Robert Graf
(breeder of AAC Network Winter Wheat)

2026 Alberta Seed Guide	Yield (% AAC Coldfront)	Maturity (days)	Height (cm)	Protein	Lodging Resistance	Winter Survivability
AAC Coldfront	100	219	85	12.4%	Very Good	Very Good
AAC Network	94	220	79	12.7%	Good	Very Good
