SeedNet

CDC PALMER KABULI CHICKPEA

CDC Palmer is a high-yielding Kabuli chickpea, with a light cream-beige colour and ram-head-shaped seed. CDC Palmer is well suited to all current chickpea growing areas in the Dark Brown and Brown soil zones of southern Saskatchewan and southeastern Alberta.

STRENGTHS:

- Ram-head seed shape
- Cream-beige seed colour
- Improved yield vs. check variety Amit (B-90)
- Earlier maturing compared to Amit or CDC Orion
- Moderate resistance to ascochyta blight
- Seed size is predominantly 9-10 mm

2023 Saskatchewan Seed Guide

Variety	Seed Shape	Yield (%)	Days to Flower	Seed weight (g)	Height (cm)	Resistance to Ascochyta Blight
Amit	Round	100	56	258	47	Intermediate
CDC Palmer	Ram-Head	102.5%	52	415	42	Intermediate
